Oven
User Manual
Dear Customer,

Thank you for purchasing this Beko product. We hope that you get the best results from your product which has been manufactured with high quality and state-of-the-art technology. Therefore, please read this entire user manual and all other accompanying documents carefully before using the product and keep it as a reference for future use. If you handover the product to someone else, give the user manual as well. Follow all warnings and information in the user manual. Remember that this user manual is also applicable for several other models. Differences between models will be identified in the manual.

**Explanation of symbols**

Throughout this user manual the following symbols are used:

- **i** - Important information or useful hints about usage.
- **!** - Warning of hazardous situations with regard to life and property.
- **⚠️** - Warning of electric shock.
- **🔥** - Warning of risk of fire.
- **🔥⚠️** - Warning of hot surfaces.

## 1 Important instructions and warnings for safety and environment

This section contains safety instructions that will help protect from risk of personal injury or property damage. Failure to follow these instructions shall void any warranty.

### General safety
- The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervised or instruction concerning use of the appliance by a responsible person for their safety.
- Young children should be supervised to ensure that they do not play with the appliance.
- Never place the product on a carpet-covered floor. Otherwise, lack of airflow beneath the product will cause electrical parts to overheat. This will cause problems with your product.
- Installation and repair procedures must always be performed by Authorized Service Agents. The manufacturer shall not be held responsible for damages arising from procedures carried out by unauthorized persons which may also void the warranty. Before installation, read the instructions carefully.
- Do not operate the product if it is defective or has any visible damage.
- Control that the product function knobs are switched off after every use.

### Electrical safety
- If the product has a failure, it should not be operated unless it is repaired by the Authorized Service Agent. There is the risk of electric shock!
- Only connect the product to a grounded outlet/line with the voltage and protection as specified in the “Technical specifications”. Have the grounding installation made by a qualified electrician while using the product with or without a transformer. Our company shall not be liable for any problems arising due to the product not being earthed in accordance with the local regulations.
- Never wash the product by spreading or pouring water onto it! There is the risk of electric shock!
- The product must be unplugged during installation, maintenance, cleaning and repairing procedures.
• If the power connection cable for the product is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

• Only use the connection cable specified in the “Technical specifications”.

• The appliance must be installed so that it can be completely disconnected from the network. The separation must be provided either by a mains plug, or a switch built into the fixed electrical installation, according to construction regulations.

• If the electrical supply is restricted, means of all-pole disconnection must be accessible and incorporated in the fixed wiring in accordance with the wiring rules.

• Rear surface of the oven gets hot when it is in use. Make sure that the electrical connection does not contact the rear surface; otherwise, connections can get damaged.

• Do not trap the mains cable between the oven door and frame and do not route it over hot surfaces. Otherwise, cable insulation may melt and cause fire as a result of short circuit.

• Any work on electrical equipment and systems should only be carried out by authorized and qualified persons.

• In case of any damage, switch off the product and disconnect it from the mains. To do this, turn off the fuse at home.

• Make sure that fuse rating is compatible with the product.

**Product safety**

• WARNING: In order to prevent accidental tipping of the appliance, for example by a child climbing onto the open oven door, the stabilizing means must be installed. Please refer to instructions for installation.

• Never use the product when your judgment or coordination is impaired by the use of alcohol and/or drugs.

• Be careful when using alcoholic drinks in your dishes. Alcohol evaporates at high temperatures and may cause fire since it can ignite when it comes into contact with hot surfaces.

• Do not place any flammable materials close to the product as the sides may become hot during use.

• During use the appliance becomes hot. Care should be taken to avoid touching heating elements inside the oven.
• Keep all ventilation slots clear of obstructions.
• Do not heat closed tins and glass jars in the oven. The pressure that would build-up in the tin/jar may cause it to burst.
• Do not place baking trays, dishes or aluminium foil directly onto the bottom of the oven. The heat accumulation might damage the bottom of the oven.
• Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven glass door since they can scratch the surface, which may result in shattering of the glass.
• Do not use a steam cleaner to clean this appliance.
• Use the shelves as described in "How to operate the electric oven".
• Do not use the product if the front door glass removed or cracked.
• Oven handle is not towel dryer. Do not hang up towel, gloves, or similar textile products when the grill function is at open door.
• Always use heat resistant oven gloves when putting in or removing dishes into/from the hot oven.
• WARNING: Ensure the appliance is switched off before replacing the lamp to avoid the possibility of electric shock.
• Unattended cooking on a hob with fat or oil can be dangerous and may result in fire. NEVER try to extinguish a fire with water, but switch off the appliance and then cover flame e.g. with a lid or a fire blanket.
• Danger of fire: Do not store items on the cooking surfaces.
• If the surface is cracked, switch off the appliance to avoid the possibility of electric shock.
• The appliance is not intended to be operated by means of an external timer or separate remote-control system.
• Vapour pressure that build up due to the moisture on the hob surface or at the bottom of the pot can cause the pot to move. Therefore, make sure that the oven surface and bottom of the pots are always dry.
For the reliability of the fire of the product;
• Make sure the plug is fitting to socket as well for not cause to spark.
• Do not use damaged or cutted or extension cable except the original cable.
• Make sure that not whether liquid or moisture on the socket is plugged to product.
**Intended use**
- This product is designed for domestic use. Commercial use will void the guarantee.
- This appliance is for cooking purposes only. It must not be used for other purposes, for example room heating.
- This product should not be used for warming the plates under the grill, drying towels, dish cloths etc. by hanging them on the oven door handles. This product should also not be used for room heating purposes.
- The manufacturer shall not be liable for any damage caused by improper use or handling errors.
- The oven can be used for defrosting, baking, roasting and grilling food.

**Safety for children**
- **WARNING:** Accessible parts will become hot when in use. To avoid burns and scalds children should be kept away.
- **WARNING:** Accessible parts may become hot when the grill in use. Children should be kept away.
- The packaging materials will be dangerous for children. Keep the packaging materials away from children. Please dispose of all parts of the packaging according to environmental standards.
- Electrical products are dangerous to children. Keep children away from the product when it is operating and do not allow them to play with the product.
- Do not place any items above the appliance that children may reach for.
- When the door is open, do **not** load any heavy object on it and do not allow children to sit on it. It may overturn or door hinges may get damaged.

**Disposing of the old product**

**Compliance with the WEEE Directive and Disposing of the Waste Product:**

This product complies with EU WEEE Directive (2012/19/EU). This product bears a classification symbol for waste electrical and electronic equipment (WEEE).

This product has been manufactured with high quality parts and materials which can be reused and are suitable for recycling. Do not dispose of the waste product with normal domestic and other wastes at the end of its service life. Take it to the collection center for the recycling of electrical and electronic equipment. Please consult your local authorities to learn about these collection centers.
Compliance with RoHS Directive:
The product you have purchased complies with EU RoHS Directive (2011/65/EU). It does not contain harmful and prohibited materials specified in the Directive.

Package information
• Packaging materials of the product are manufactured from recyclable materials in accordance with our National Environment Regulations. Do not dispose of the packaging materials together with the domestic or other wastes. Take them to the packaging material collection points designated by the local authorities.
2 General information

Overview

1. Front door
2. Handle
3. Bottom drawer
4. Tray
5. Wire shelf
6. Control panel
7. Burner plate
8. Fan motor (behind steel plate)
9. Lamp
10. Grill heating element
11. Shelf positions

1. Warning lamp
2. Thermostat lamp
3. Function knob
4. Single-circuit cooking plate Rear left
5. Dual-circuit cooking plate Front left
6. Digital timer
7. Single-circuit cooking plate Front right
8. Single-circuit cooking plate Rear right
9. Thermostat knob
Package contents

Accessories supplied can vary depending on the product model. Not every accessory described in the user manual may exist on your product.

1. User manual
2. Oven tray
   Used for pastries, frozen foods and big roasts.

3. Deep tray
   Used for pastries, large roasts, juicy dishes, and for collecting the fat while grilling.

4. Wire Shelf
   Used for roasting and for placing the food to be baked, roasted or cooked in casserole dishes to the desired rack.

5. Small wire shelf
   It is placed into the tray (if supplied) in order to collect the dripping fat while grilling so that the oven is kept clean.

6. Placing the wire shelf and tray onto the telescopic racks properly
   Telescopic racks allow you to install and remove the trays and wire shelf easily. When using the tray and wire shelf with telescopic racks, make sure that the pins at the rear section of the telescopic rack stands against the edges of the wire shelf and tray.
7. Placing the wire shelf and tray onto the wire racks properly

Products without telescopic pull-out: With product without a telescopic pull-out, the baking tray and grill are pushed in with their edges between the runners on the side mounts.

It is important to place the wire shelf and/or tray onto the rack properly. Slide the wire shelf or tray between 2 rails and make sure that it is balanced before placing food on it. (Please see the following figure).

8. Splash back assembly

Splashback

Please take splashback and package of screws, nuts, fillers from warmer drawer

Place splashback according to the drawing, place nut inside splashback on to the hole, screw the splashback to the burner’s plate with screw form under burner plate

1 Splashback
2 Screw
3 Burner plate
4 Nut

If you don’t want to install splashback on to your cooker, you can place fillers to the holes.

Do not overtighten the screws as damage to the hob or splashback could occur.

---

Basics: Information on the energy label of electrical ovens is given in accordance with the EN 50304 standard. Those values are determined under standard load with bottom-top heater or fan assisted heating (if any) functions.

---

Technical specifications may be changed without prior notice to improve the quality of the product.

Figures in this manual are schematic and may not exactly match your product.

Values stated on the product labels or in the documentation accompanying it are obtained in laboratory conditions in accordance with relevant standards. Depending on operational and environmental conditions of the product, these values may vary.
3 Installation

Product must be installed by a qualified person in accordance with the regulations in force. The manufacturer shall not be held responsible for damages arising from procedures carried out by unauthorized persons which may also void the warranty.

Preparation of location and electrical installation for the product is under customer’s responsibility.

DANGER:
The product must be installed in accordance with all local electrical regulations.

DANGER:
Prior to installation, visually check if the product has any defects on it. If so, do not have it installed. Damaged products cause risks for your safety.

Before installation
To ensure that critical air gaps are maintained under the appliance, we recommend that this appliance is mounted on a solid base and that the feet do not sink into any carpet or soft flooring.

The kitchen floor must be able to carry the weight of the appliance plus the additional weight of cookware and bakeware and food.

- It can be used with cabinets on either side but in order to have a minimum distance of 400mm above hotplate level allow a side clearance of 65mm between the appliance and any wall, partition or tall cupboard.
- It can also be used in a free standing position. Allow a minimum distance of 750 mm above the hob surface.
- (*) If a cooker hood is to be installed above the cooker, refer to cooker hood manufacturer’s instructions regarding installation height (min 650 mm).
- The appliance corresponds to device class 1, i.e. it may be placed with the rear and one side to kitchen walls, kitchen furniture or equipment of any size. The kitchen furniture or equipment on the other side may only be of the same size or smaller.
- Any kitchen furniture next to the appliance must be heat-resistant (100 °C min.).

Safety chain
The appliance must be secured against overbalancing by using the supplied two safety chains on your oven.
Fasten hook (1) by using a proper peg to the kitchen wall (6) and connect safety chain (3) to the hook via the locking mechanism (2).
Stability hook
2 Locking mechanism
3 Safety chain (supplied and mounted to oven)
4 Firmly fix chain to cooker rear
5 Rear of cooker
6 Kitchen wall

Stability chain to be as short as practicable to avoid oven tilting forward and diagonal to avoid oven side tilting.

Cooker stability chain for cookers not designed with bracket engagement slot.

Installation and connection
Product can only be installed and connected in accordance with the statutory installation rules.

Do not install the product next to refrigerators or freezers. The heat emitted by the product will increase the energy consumption of cooling appliances.
• Carry the product with at least two persons.
• Product must be placed directly on the floor. It must not be placed onto a base or a pedestal.

Do not use the door and/or handle to carry or move the product. The door, handle or hinges get damaged.

Electrical connection
Connect the product to a grounded outlet/line protected by a fuse of suitable capacity as stated in the "Technical specifications" table. Have the grounding installation made by a qualified electrician while using the product with or without a transformer. Our company shall not be liable for any damages that will arise due to using the product without a grounding installation in accordance with the local regulations.

DANGER:
The product must be connected to the mains supply only by an authorised and qualified person. The product's warranty period starts only after correct installation. Manufacturer shall not be held responsible for damages arising from procedures carried out by unauthorised persons.

DANGER:
The power cable must not be clamped, bent or trapped or come into contact with hot parts of the product. A damaged power cable must be replaced by a qualified electrician. Otherwise, there is risk of electric shock, short circuit or fire!

The mains supply data must correspond to the data specified on the type label of the product. The rating plate is either seen when the door or the lower cover is opened or it is located at the rear wall of the unit depending on the unit type. Power cable of your product must comply with the values in "Technical specifications" table.

DANGER:
Before starting any work on the electrical installation, disconnect the product from the mains supply. There is the risk of electric shock!

Connecting the power cable
1. If a power cable is not supplied together with your product, a power cable that you would select from the table (Technical specifications, page 12) in accordance with the electrical installation at your home must be connected to your product by following the instructions in cable diagram. If it is not possible to disconnect all poles in the supply power, a disconnection unit with at least 3 mm contact clearance (fuses, line safety switches, contactors) must be connected and all the poles of this disconnection unit must be adjacent to (not above) the product in
accordance with IEE directives. Failure to obey this instruction may cause operational problems and invalidate the product warranty.

Additional protection by a residual current circuit breaker is recommended.

2. Open the terminal block cover with a screwdriver.

3. Insert the power cable through the cable clamp below the terminal and secure it to the main body with the integrated screw on cable clamping component.

4. Connect the cables according to the supplied diagram.

5. After completing the wire connections, close the terminal block cover.

6. Route the power cable so that it will not contact the product and get squeezed between the product and the wall.

- Push the product towards the kitchen wall.

- Adjusting the feet of oven
  Vibrations during use may cause cooking vessels to move. This dangerous situation can be avoided if the product is level and balanced.
  For your own safety please ensure the product is level by adjusting the four feet at the bottom by turning left or right and align level with the work top.

Final check
1. Reconnect the product to the mains.
2. Check electrical functions.

Future Transportation
- Keep the product’s original carton and transport the product in it. Follow the instructions on the carton. If you do not have the original carton, pack the product in bubble wrap or thick cardboard and tape it securely.
- To prevent the wire grill and tray inside the oven from damaging the oven door, place a strip of cardboard onto the inside of the oven door that lines up with the position of the trays. Tape the oven door to the side walls.
- Do not use the door or handle to lift or move the product.

- Do not place any objects onto the product and move it in upright position.
- Check the general appearance of your product for any damages that might have occurred during transportation.
**Tips for saving energy**

The following information will help you to use your appliance in an ecological way, and to save energy:

- Use dark coloured or enamel coated cookware in the oven since the heat transmission will be better.
- While cooking your dishes, perform a preheating operation if it is advised in the user manual or cooking instructions.
- Do not open the door of the oven frequently during cooking.
- Try to cook more than one dish in the oven at the same time whenever possible. You can cook by placing two cooking vessels onto the wire shelf.
- Cook more than one dish one after another. The oven will already be hot.
- You can save energy by switching off your oven a few minutes before the end of the cooking time. Do not open the oven door.
- Defrost frozen dishes before cooking them.
- Use pots/pans with cover for cooking. If there is no cover, energy consumption may increase 4 times.
- Select the burner which is suitable for the bottom size of the pot to be used. Always select the correct pot size for your dishes. Larger pots require more energy.
- Pay attention to use flat bottom pots when cooking with electric hobs. Pots with thick bottom will provide a better heat conduction. You can obtain energy savings up to 1/3.
- Vessels and pots must be compatible with the cooking zones. Bottom of the vessels or pots must not be smaller than the hotplate.
- Keep the cooking zones and bottom of the pots clean. Dirt will decrease the heat conduction between the cooking zone and bottom of the pot.
- For long cookings, turn off the cooking zone 5 or 10 minutes before the end of cooking time. You can obtain energy savings up to 20% by using the residual heat.

---

**Initial use**

**Time setting**

Before you can use the oven, the time must be set. If the time is not set, oven will not operate.

While making any adjustment, related symbols on the clock will flash.

Press "+" or "−" (5/6) keys to set the time after the oven in energized for the first time.

1 Program key
2 Cooking time
3 End of cooking time
4 Alarm
5 Minus key
6 Plus key
7 Screen brightness setting
8 Alarm volume
9 Current time
10 Keylock
11 Adjustment key

After setting the time, you can start and end the cooking by selecting the desired position with temperature button and function button.

If the current time is not set, time setting will start increasing/moving up from 12:00. Clock symbol ‘9’ will be displayed to indicate that the current time has not been set. This symbol will disappear once the time is set.
Current time settings are cancelled in case of power failure. It needs to be readjusted.

To change the time of the day you have previously set:
1. Press (11) key to activate current time symbol ‘9’.
2. Press ‘-’ or ‘+’ (5/6) keys to set the current time.

**Changing screen brightness adjustment**
1. Press (11) key to activate screen brightness symbol ‘7’ for screen brightness adjustment.
2. Press ‘-‘ or ‘+‘ (5/6) keys to set the desired brightness.

» Selected brightness level will appear as d-01, d-02 or d-03 on the display.

**First cleaning of the appliance**

The surface might get damaged by some detergents or cleaning materials.

Do not use aggressive detergents, cleaning powders/creams or any sharp objects during cleaning.

Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.

1. Remove all packaging materials.
2. Wipe the surfaces of the appliance with a damp cloth or sponge and dry with a cloth.

**Initial heating**

Heat up the product for about 30 minutes and then switch it off. Thus, any production residues or layers will be burnt off and removed.

**Electric oven**
1. Take all baking trays and the wire grill out of the oven.
2. Close the oven door.
3. Select Static position.
4. Select the highest oven power; See How to operate the electric oven, page 20.
5. Operate the oven for about 30 minutes.
6. Turn off your oven; See How to operate the electric oven, page 20

**Grill oven**
1. Take all baking trays and the wire grill out of the oven.
2. Close the oven door.
3. Select the highest grill power; see How to operate the grill, page 26.
4. Operate the grill about 30 minutes.
5. Turn off your grill; see How to operate the grill, page 26

**WARNING**

Hot surfaces cause burns!
Product may be hot when it is in use. Never touch the hot burners, inner sections of the oven, heaters and etc. Keep children away.
Always use heat resistant oven gloves when putting in or removing dishes into/from the hot oven.

Smoke and smell may emit for a couple of hours during the initial operation. This is quite normal. Ensure that the room is well ventilated to remove the smoke and smell. Avoid directly inhaling the smoke and the smell that emits.
### 5 How to use the hob

#### General information about cooking

- Never fill the pan with oil more than one third of it. Do not leave the hob unattended when heating oil. Overheated oils bring risk of fire. **Never attempt to extinguish a possible fire with water!** When oil catches fire, cover it with a fire blanket or damp cloth. Turn off the hob if it is safe to do so and call the fire department.

- Before frying foods, always dry them well and gently place into the hot oil. Ensure complete thawing of frozen foods before frying.

- Do not cover the vessel you use when heating oil.

- Place the pans and saucepans in a manner so that their handles are not over the hob to prevent heating of the handles. Do not place unbalanced and easily tilting vessels on the hob.

- Do not place empty vessels and saucepans on cooking zones that are switched on. They might get damaged.

- Operating a cooking zone without a vessel or saucepan on it will cause damage to the product. Turn off the cooking zones after the cooking is complete.

- As the surface of the product can be hot, do not put plastic and aluminum vessels on it. Clean any melted such materials on the surface immediately. Such vessels should not be used to keep foods either.

- Use flat bottomed saucepans or vessels only.

- Put appropriate amount of food in saucepans and pans. Thus, you will not have to make any unnecessary cleaning by preventing the dishes from overflowing. Do not put covers of saucepans or pans on cooking zones. Place the saucepans in a manner so that they are centered on the cooking zone.

- When you want to move the saucepan onto another cooking zone, lift and place it onto the cooking zone you want instead of sliding it.

#### Tips about glass ceramic hobs

- Glass ceramic surface is heatproof and is not affected by big temperature differences.

- Do not use the glass ceramic surface as a place of storage or as a cutting board.

- Use only the saucepans and pans with machined bottoms. Sharp edges create scratches on the surface.

- Do not use aluminum vessels and saucepans. Aluminum damages the glass ceramic surface.

---

**Spills may damage the glass ceramic surface and cause fire.**

**Do not use vessels with concave or convex bottoms.**

**Use only the saucepans and pans with flat bottoms. They ensure easier heat transfer. If the diameter of the saucepan is too small, energy will be wasted.**

#### Using the hobs

- Single-circuit cooking plate 14-16 cm
2 Dual-circuit cooking plate 18-20/12-14 cm
3 Single-circuit cooking plate 14-16 cm
4 Single-circuit cooking plate 18-20 cm is list of advised diameter of pots to be used on related burners.

**DANGER:**
Do not allow any object to drop on the hob. Even small objects such as a saltshaker may damage the hob.
Do not use cracked hobs. Water may leak through these cracks and cause short circuit.
In case of any kind of damage on the surface (eg., visible cracks), switch off the product immediately to minimize the risk of electric shock.

Glass ceramic hob is equipped with an operation light and a hot zone warning indicator.
Hot zone warning indicator indicates the status of the active zone and it remains lit after the plate is turned off. When the temperature of the plate cools down to a level that it can be touched by hand, warning indicator turns off. Flickering of the hot zone warning indicator is not a failure.

Quick heating glass-ceramic hobs emit a bright light when they are switched on. Do not stare at the bright light.

**Turning on the ceramic plates**
The hob control knobs are used for operating the plates. To obtain the desired cooking power, turn the hob control knobs to the corresponding level.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Turning off the ceramic plates**
Turn the plate knob to OFF (upper) position.

**Using multi-segmented cooking zones**
Multi-segmented cooking zones allows to cook with different size of saucepans on the same cooking zone. When these cooking zones are activated, first the inward cooking zone turns on.
1. To change the active cooking zone diameter, turn the control knob clockwise.
2. A "click" will be heard as soon as the hotplate radius changes.

**Turning off multi-segment cooking zones**
1. Turn the knob counter clockwise to OFF (upper) position to turn off the oven. All segments of the cooking zone are turned off.

1 Position 1
2 Position 2
3 Position 3

Position 2 and 3 of the multi-segment cooking zones do not operate independently.
6 How to operate the oven

General information on baking, roasting and grilling

**WARNING**

Hot surfaces cause burns!
Product may be hot when it is in use. Never touch the hot burners, inner sections of the oven, heaters and etc. Keep children away. Always use heat resistant oven gloves when putting in or removing dishes into/from the hot oven.

**DANGER:**

Be careful when opening the oven door as steam may escape. Exiting steam can scald your hands, face and/or eyes.

Tips for baking
- Use non-sticky coated appropriate metal plates or aluminum vessels or heat-resistant silicone moulds.
- Make best use of the space on the rack.
- Place the baking mould in the middle of the shelf.
- Select the correct rack position before turning the oven or grill on. Do not change the rack position when the oven is hot.
- Keep the oven door closed.

Tips for roasting
- Treating whole chicken, turkey and large piece of meat with dressings such as lemon juice and black pepper before cooking will increase the cooking performance.
- It takes about 15 to 30 minutes longer to roast meat with bones when compared to roasting the same size of meat without bones.
- Each centimeter of meat thickness requires approximately 4 to 5 minutes of cooking time.
- Let meat rest in the oven for about 10 minutes after the cooking time is over. The juice is better distributed all over the roast and does not run out when the meat is cut.
- Fish should be placed on the middle or lower rack in a heat-resistant plate.

Tips for grilling
When meat, fish and poultry are grilled, they quickly get brown, have a nice crust and do not get dry. Flat pieces, meat skewers and sausages are particularly suited for grilling as are vegetables with high water content such as tomatoes and onions.
- Distribute the pieces to be grilled on the wire shelf or in the baking tray with wire shelf in such a way that the space covered does not exceed the size of the heater.
- Slide the wire shelf or baking tray with grill into the desired level in the oven. If you are grilling on the wire shelf, slide the baking tray to the lower rack to collect fats. Add some water in the tray for easy cleaning.

Foods that are not suitable for grilling carry the risk of fire. Only grill food which is suitable for intensive grilling heat. Do not place the food too far in the back of the grill. This is the hottest area and fatty food may catch fire.

How to operate the electric oven

Before you can use the oven, the time must be set. If the time is not set, oven will not operate.

Select temperature and operating mode

1. Set the Temperature knob to the desired temperature.

1  Function knob
2  Thermostat knob
2. Set the Function knob to the desired operating mode.
   » Oven heats up to the adjusted temperature and maintains it. During heating, temperature lamp stays on.

**Switching off the electric oven**

Turn the function knob and temperature knob to off (upper) position.

**Rack positions (For models with wire shelf)**

It is important to place the wire shelf onto the side rack correctly. Wire shelf must be inserted between the side racks as illustrated in the figure. Do not let the wire shelf stand against the rear wall of the oven. Slide your wire shelf to the front section of the rack and settle it with the help of the door in order to obtain a good grill performance.

**Operating modes**

The order of operating modes shown here may be different from the arrangement on your product.

**Top and bottom heating**

Top and bottom heating are in operation. Food is heated simultaneously from the top and bottom. For example, it is suitable for cakes, pastries, or cakes and casseroles in baking moulds. Cook with one tray only.

**Bottom heating**

Only bottom heating is in operation. It is suitable for pizza and for subsequent browning of food from the bottom.

**Fan supported bottom/top heating**

Top heating, bottom heating plus fan (in the rear wall) are in operation. Hot air is evenly distributed throughout the oven rapidly by means of the fan. Cook with one tray only.

**Operating with fan**

The oven is not heated. Only the fan (in the rear wall) is in operation. Suitable for thawing frozen granular food slowly at room temperature and cooling down the cooked food.

**Fan Heating**

Warm air heated by the rear heater is evenly distributed throughout the oven rapidly by means of the fan. It is suitable for cooking your meals in different rack levels and preheating is not required in most cases. Suitable for cooking with multi trays.

**"3D" function**

Top heating, bottom heating and fan assisted heating (in the rear wall) are in operation. Food is cooked evenly and quickly all around. Cook with one tray only.

**Full grill**

Large grill at the ceiling of the oven is in operation. It is suitable for grilling large amount of meat.

- Put big or medium-sized portions in correct rack position under the grill heater for grilling.
- Set the temperature to maximum level.
- Turn the food after half of the grilling time.
Grilling effect is not as strong as in Full Grill

- Put small or medium-sized portions in correct shelf position under the grill heater for grilling.
- Set the desired temperature.
- Turn the food after half of the grilling time.

**Using the oven clock**

1. Program key
2. Cooking time
3. End of cooking time
4. Alarm
5. Minus key
6. Plus key
7. Screen brightness setting
8. Alarm volume
9. Current time
10. Keylock
11. Adjustment key

If no cooking setting is made, time of the day cannot be set.

Cooking time will be displayed once the cooking starts.

**Cooking by specifying the cooking time:**

You can set the oven so that it will stop at the end of the specified time by setting the cooking time on the clock.

1. To adjust the cooking time, Press Program key (1) and activate the Cooking Time symbol (2).
2. Press ‘−’ / ‘+’ (5/6) keys to set the cooking time.
   » Once the Cooking Time is set, Cooking symbol will be displayed continuously.

**If you want to set the end of cooking time to a later time:**

After setting the cooking time on the clock, you can set the end of cooking time to a later time.

1. To adjust the cooking time, press Program key (1) and activate the Cooking Time symbol (2).
2. Adjust the cooking time with Minus (5) and Plus (6) keys.
   » Cooking Time symbol remains lit (displayed continuously) after setting the cooking time.
3. To set the End of Cooking Time, Press Program key (1) and activate the Cooking Time symbol (3).
4. Press – (5) and + (6) keys to set the end of cooking time.
   » Once the End of Cooking Time is set, End of Cooking symbol and Cooking symbol will be displayed continuously. The End of Cooking Time symbol (3) will disappear as soon as the cooking starts.
5. Put your dish into the oven.
6. Select operation mode and temperature.
   » Oven timer automatically calculates the startup time for cooking by using the end of cooking time and the cooking period you have set. Selected operation mode is activated when the startup time of cooking has come and the oven is heated

Maximum time that can be set for end of cooking is 5 hours 59 minutes.
Program will be cancelled in case of power failure. You must reprogram the oven.

While making any adjustments, related symbols will flash on the display. You must wait for a short time for the settings to take effect.
up to the set temperature. It maintains this temperature until the end of cooking time.

7. After the cooking process is completed, "End" appears on the displayed and the alarm will sound.

8. Alarm signal will sound for 2 minutes. To stop the alarm signal, just press any key. Alarm will be silenced and current time will be displayed.

9. Turn off the oven with the Temperature knob and Function knob.

Using the keylock

Activating the keylock

You can prevent oven from being used by activating the Keylock function.

Deactivating the keylock

1. Press Adjustment key (11) to activate Keylock symbol (10).
   » "On" will appear on the display.
2. Press '-' (5) to deactivate the keylock.
   » "OFF" will be displayed once the keylock is deactivated.

Using the clock as an alarm

You can use the clock of the product for any warning or reminder apart from the cooking programme.

The alarm clock has no influence on the functions of the oven. It is only used as a warning. For example, this is useful when you want to turn food in the oven at a certain point of time. Alarm clock will give a signal once the time you set is over.
Setting the alarm clock
1. Press Program key (1) to activate the alarm time symbol (4).

   Maximum alarm time can be 23 hours and 59 minutes.

2. Adjust the alarm time using “+” / “-” (5/6) keys.
   » Alarm symbol will remain lit and the alarm time will appear on the display once the alarm time is set.
3. At the end of the alarm time, Alarm Time symbol (4) will start flashing and the alarm signal is heard.

Turning off the alarm
1. To stop the alarm, just press any key.
   » Alarm will be silenced and current time will be displayed.

If you want to cancel the alarm:
1. To reset the alarm time, press Program key (1) to activate the alarm time symbol (4).
2. Press and hold the “-” (5) key until “00:00” is displayed.

   Alarm time will be displayed. If the alarm time and cooking time are set concurrently, shortest time will be displayed.

Changing alarm tone
1. Press Setting key (11) to activate the Alarm Tone symbol (8).
2. Adjust the desired tone using “+” / “-” (5/6) keys.
   » Selected alarm tone will appear as "b-01", "b-02" or "b-03" on the display.
## Cooking times table

The timings in this chart are meant as a guide. Timings may vary due to temperature of food, thickness, type and your own preference of cooking.

<table>

</tbody>
</table>

When cooking with 2 trays at the same time, place the deeper tray on the upper rack and the other one on the lower rack.

* It is suggested to perform preheating for all foods.

**) In a cooking that requires preheating, preheat at the beginning of cooking until the thermostat lamp turns off.

### Tips for baking cake
- If the cake is too dry, increase the temperature by 10°C and decrease the cooking time.
- If the cake is wet, use less liquid or lower the temperature by 10°C.

### Tips for baking pastry
- If the pastry is too dry, increase the temperature by 10°C and decrease the cooking time.
- If cooked well on the inside but sticky on the outside use less liquid, lower the temperature and increase the cooking time.

1st rack of the oven is the **bottom** rack.
cooking time. Dampen the layers of dough with a sauce composed of milk, oil, egg and yoghurt.

- If the pastry takes too long to bake, pay care that the thickness of the pastry you have prepared does not exceed the depth of the tray.
- If the upper side of the pastry gets browned, but the lower part is not cooked, make sure that the amount of sauce you have used for the pastry is not too much at the bottom of the pastry. Try to scatter the sauce equally between the dough layers and on the top of pastry for an even browning.

Cook the pastry in accordance with the mode and temperature given in the cooking table. If the bottom part is still not browned enough, place it on one lower rack next time.

Tips for cooking vegetables

- If the vegetable dish runs out of juice and gets too dry, cook it in a pan with a lid instead of a tray. Closed vessels will preserve the juice of the dish.
- If a vegetable dish does not get cooked, boil the vegetables beforehand or prepare them like canned food and put in the oven.

How to operate the grill

Before you can use the oven, the time must be set. If the time is not set, oven will not operate.

</tbody>
</table>

* depending on thickness

WARNING

Close oven door during grilling. Hot surfaces may cause burns!

Switching on the grill

1. Turn the Function knob to the desired grill symbol.
2. Then, select the desired grilling temperature.
3. If required, perform a preheating of about 5 minutes.
   » Temperature light turns on.

Switching off the grill

1. Turn the Function knob to Off (top) position.

Rack positions

Grill performance will decrease if the wire grill stands against rear part of the oven. Slide your wire grill to the front section of the rack and settle it with the help of the door in order to obtain the best grill performance.

Foods that are not suitable for grilling carry the risk of fire. Only grill food which is suitable for intensive grilling heat.

Do not place the food too far in the back of the grill. This is the hottest area and fatty food may catch fire.
# Maintenance and care

## General information
Service life of the product will extend and the possibility of problems will decrease if the product is cleaned at regular intervals.

**DANGER:**
Disconnect the product from mains supply before starting maintenance and cleaning works.
There is the risk of electric shock!

**DANGER:**
Allow the product to cool down before you clean it.
Hot surfaces may cause burns!

- Clean the product thoroughly after each use. In this way it will be possible to remove cooking residues more easily, thus avoiding these from burning the next time the appliance is used.
- No special cleaning agents are required for cleaning the product. Use warm water with washing liquid, a soft cloth or sponge to clean the product and wipe it with a dry cloth.
- Always ensure any excess liquid is thoroughly wiped off after cleaning and any spillage is immediately wiped dry.
- Do not use cleaning agents that contain acid or chloride to clean the stainless or inox surfaces and the handle. Use a soft cloth with a liquid detergent (not abrasive) to wipe those parts clean, paying attention to sweep in one direction.

The surface might get damaged by some detergents or cleaning materials. Do not use aggressive detergents, cleaning powders/creams or any sharp objects during cleaning. Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.

Do not use steam cleaners to clean the appliance as this may cause an electric shock.

## Cleaning the hob

### Glass ceramic surfaces
Wipe the glass ceramic surface using a piece of cloth dampened with cold water in a manner as not to leave any cleaning agent on it. Dry with a soft and dry cloth. Residues may cause damage on the glass ceramic surface when using the hob for the next time.
Dried residues on the glass ceramic surface should under no circumstances be scraped with hook blades, steel wool or similar tools. Remove calcium stains (yellow stains) by a small amount of lime remover such as vinegar or lemon juice. You can also use suitable commercially available products.
If the surface is heavily soiled, apply the cleaning agent on a sponge and wait until it is absorbed well. Then, clean the surface of the hob with a damp cloth.

Sugar-based foods such as thick cream and syrup must be cleaned promptly without waiting the surface to cool down. Otherwise, glass ceramic surface may be damaged permanently.

Slight color fading may occur on coatings or other surfaces in time. This will not affect operation of the product. Color fading and stains on the glass ceramic surface is a normal condition, and not a defect.

### Scraper for cleaning the glass ceramic surface
Clean the spilled residues and stuck dirt with a commercially available scraper which is specially designed for glass ceramic surfaces.
To avoid scratches, hold the scraper at a narrow angle.
Cleaning the control panel
Clean the control panel and knobs with a damp cloth and wipe them dry.

![Warning]
Do not remove the control buttons/knobs to clean the control panel. Control panel may get damaged!

Cleaning the oven
To clean the side wall
1. Remove the front section of the side rack by pulling it in the opposite direction of the side wall.
2. Remove the side rack completely by pulling it towards you.

Catalytic walls
Side walls or just back wall of oven interior may be covered with catalytic enamel. The catalytic walls of the oven must not be cleaned. The porous surface of the walls is self-cleaning by absorbing and converting spitting fat (steam and carbon dioxide).

Clean oven door
To clean the oven door, use warm water with washing liquid, a soft cloth or sponge to clean the product and wipe it with a dry cloth.

![Warning]
Don't use any harsh abrasive cleaners or sharp metal scrapers for cleaning the oven door. They could scratch the surface and destroy the glass.

Removing the oven door
1. Open the front door (1).
2. Open the clips at the hinge housing (2) on the right and left hand sides of the front door by pressing them down as illustrated in the figure.
3. Move the front door to half-way.
4. Remove the front door by pulling it upwards to release it from the right and left hinges.

![Steps carried out during removing process should be performed in reverse order to install the door. Do not forget to close the clips at the hinge housing when reinstalling the door.]
Removing the door inner glass

The inner glass panel of the oven door can be removed for cleaning.

Use the spade provided with the product to remove the inner glass for cleaning.

1. Open the oven door.
2. Place the spade (1) to the area indicate on the glass panel (3) and push in the direction shown to remove the glass.
3. To reattach the glass panel in its seat, insert its bottom part into the plastic slot (2). Pressing it from the upper part towards the metal frame (6), ensure that the pins (4) are seated into their slots (5).

Replacing the oven lamp

DANGER:
Before replacing the oven lamp, make sure that the product is disconnected from mains and cooled down in order to avoid the risk of an electrical shock. Hot surfaces may cause burns!

The oven lamp is a special electric light bulb that can resist up to 300 °C. See Technical specifications, page 12 for details. Oven lamps can be obtained from Authorised Service Agents.

If your oven is equipped with a round lamp:
1. Disconnect the product from mains.
2. Turn the glass cover counter clockwise to remove it.
3. Remove the oven lamp by turning it counter clockwise and replace it with the new one.
4. Install the glass cover.
8 Troubleshooting

Oven emits steam when it is in use.
• It is normal that steam escapes during operation. >>> This is not a fault.

Product emits metal noises while heating and cooling.
• When the metal parts are heated, they may expand and cause noise. >>> This is not a fault.

Product does not operate.
• The mains fuse is defective or has tripped. >>> Check fuses in the fuse box. If necessary, replace or reset them.
• Product is not plugged into the (grounded) socket. >>> Check the plug connection.
• Buttons/knobs/keys on the control panel do not function. >>> Keylock may be enabled. Please disable it. (See. Using the keylock, page 23)

Oven light does not work.
• Oven lamp is defective. >>> Replace oven lamp.
• Power is cut. >>> Check if there is power. Check the fuses in the fuse box. If necessary, replace or reset the fuses.

Oven does not heat.
• Function and/or Temperature are not set. >>> Set the function and the temperature with the Function and/or Temperature knob/key.
• In models equipped with a timer, the timer is not adjusted. >>> Adjust the time. (In products with microwave oven, timer controls only microwave oven.)
• Power is cut. >>> Check if there is power. Check the fuses in the fuse box. If necessary, replace or reset the fuses.

(In models with timer) Clock display is blinking or clock symbol is on.
• A previous power outage has occurred. >>> Adjust the time / Switch of the product and switch it on again.

Consult the Authorised Service Agent or the dealer where you have purchased the product if you can not remedy the trouble although you have implemented the instructions in this section. Never attempt to repair a defective product yourself.
